

BSEManager::evolveBinary

ARInteraction::modifyOne
Particle

BSEManager::evolveStar

```
graph LR; A[BSEManager::evolveBinary] --> C[BSEManager::evolveStar]; B[ARInteraction::modifyOne Particle] --> C;
```

The diagram illustrates a flow or dependency where two functions, 'BSEManager::evolveBinary' and 'ARInteraction::modifyOne Particle', both point to a single function, 'BSEManager::evolveStar'. The arrows indicate a directional relationship from the left-hand functions to the right-hand function.
